

One learning goal. More ways to get there.

A four-week school-team pilot combining AI-assisted lesson design with Brandon's experience as a practising teacher and special education consultant.

CAD \$495

Pilot fee • one school team

Up to 6 teachers

2 live sessions with Brandon

45 minutes each, online

A tailored lesson your team can actually teach.

For a Grade 5/6 team with one skill to work on. Bring aggregate classroom evidence. Leave with a focused lesson design, several ways for pupils to access the same goal, and a fresh check to guide the next decision.

01 Interpret together

In the first live session, choose the learning goal, evidence to look for and classroom constraints.

02 Design, review, teach

AI helps develop the lesson, access options and fresh check. Brandon reviews the instructional choices before the tailored pack is delivered.

03 Learn and refine

Try the lesson. In the second live session, review the evidence and agree on one refinement and the next teaching step.

Small enough to try. Concrete enough to use.

Before the first session

Choose one grade/skill and a team lead. Gather aggregate evidence. Keep pupil-level records inside your school.

Week 1 | Live session 1

Agree on the goal, success criterion and classroom constraints. We use AI-assisted design to prepare one tailored lesson pack for Brandon's review.

Weeks 2-3 | Classroom use

Teach the reviewed lesson with your team. Use its access options and fresh check. Record delivery and learner response separately.

Week 4 | Live session 2

Review what happened and its limits. Agree on one refinement to the lesson pack and a written next-step brief.

Included

- Two 45-minute live sessions with Brandon
- One tailored lesson, access options and fresh check
- One agreed revision after the review
- Reusable workspace, Fraction Studio and worked sample
- One written next-step brief

Scope and fit

One team of up to six at one school; one skill focus; one lesson pack and one revision. This is not a diagnostic service, standardized assessment, guaranteed attainment programme or full curriculum. AI supports design; teacher review precedes customer delivery. No integrations or subscriptions. The participating team may reuse the original kit.

To enquire, send your role, school, grade/skill focus and preferred meeting windows. Do not attach pupil names, recordings or identifiable work. Dates, final scope and any applicable taxes are confirmed in writing before booking. No payment is collected through this brief.
